

Justin X. Hale

Senior UX/Product Designer

(979) 703-0894 | JustinXHale@gmail.com | portfolio: justinxhale.github.io

PROFESSIONAL SUMMARY

Product Designer specializing in defining and simplifying complex, multi-step systems within enterprise SaaS and developer-facing platform environments. I shape foundational interaction patterns, reduce structural friction, and clarify distributed workflows across multi-tenant, RBAC-governed systems early in a product's lifecycle.

TECHNOLOGIES & PLATFORMS EXPERTISE

Enterprise SaaS • Multi-tenant Architecture • RBAC • Authentication Flows • OAuth • API Design • Developer Portals • CLI Tooling • SDK Onboarding • AI/ML Platforms • RAG Workflows • Distributed Systems • Multi-cluster Environments • Cloud Infrastructure • DevOps Workflows • OpenShift • Kubernetes • Container Registries • PatternFly • Jupyter Notebooks • GitHub • VS Code • Figma • Miro • Jira

PROFESSIONAL EXPERIENCES

September 2021- Present

Red Hat, Inc.

Senior Product Designer

- Owned UX for enterprise SaaS infrastructure platforms spanning multi-cluster environments, developer portals, AI/ML operational systems, and developer-facing CLI tooling used by platform engineers and data teams.
- Embedded directly within CLI workflows to identify architectural friction, restructuring command hierarchies and reducing prompt states from 30+ to ~12 core interaction paths, simplifying dependency chains across distributed provisioning flows.
- Influenced command structure, naming conventions, and interaction sequencing to better align with backend state transitions and system constraints, improving mental model clarity for engineers operating in complex environments.
- Partnered with engineering to reduce unnecessary state branching and clarify error propagation paths, decreasing cognitive load in multi-step configuration tasks across cluster-based systems.
- Authored CLI UX standards adopted within PatternFly, shaping interaction consistency, accessibility, and state management patterns across multiple enterprise products.
- Facilitated roadmap alignment across AI/ML platform initiatives, ensuring usability decisions reflected enterprise deployment models, RBAC and authentication flows, multi-tenant governance considerations, and environment-based configuration lifecycles.

Interaction Designer

- Reimagined SDK and CLI onboarding flows for InstructLab, improving discoverability across API-driven model training workflows and developer configuration environments.
- Defined ROSA CLI standardization across cloud-managed OpenShift services, improving consistency across multi-environment configuration surfaces.
- Championed accessibility and documentation improvements in developer tooling, reducing onboarding friction and support dependency.
- Contributed reusable system-level components and documentation to PatternFly to improve scalability and cross-product cohesion.

Justin X. Hale

Senior UX/Product Designer

(979) 703-0894 | JustinXHale@gmail.com | portfolio: justinxhale.github.io

Associate User Experience Designer

- Led redesign of Quay.io, an enterprise SaaS container registry and security platform, refining repository management, vulnerability reporting dashboards, API-integrated workflows, and role-based authentication flows across multi-organization teams.
- Reduced design debt and improved scalability through structured PatternFly adoption, aligning complex DevOps workflows across product surfaces.

August 2021- September 2019

Digital Media Specialist, Integral Care

- Implemented design thinking methods, optimizing company email layouts based on user testing and market research, resulting in a notable increase in click-through rates.
- Developed and managed a state-wide marketing campaign vision for various digital experiences, ensuring an impactful and user-centric approach.

September 2019 - November 2017

Communication Specialists, Community Advancement Network

- Ensured physical and digital deliverables followed user-centered and accessibility practices
- Conducted ongoing performance tracking and success metrics for email marketing social media management
- Created and implemented social media campaigns, which resulted in a 13% increase of traffic and over 16,000 new visitors over two years

INDEPENDENT PROJECTS

RefLog — *Mobile performance logging app for rugby referees*

Available on android and ios apps

- Designed and launched a cross-platform app with multi-role workflows (Referee / Coach modes), scalable data visualizations, and analytics dashboards.
- Conducted usability testing in high-pressure field environments to optimize task efficiency and cognitive load.
- Implemented OAuth-based authentication flows (Google/GitHub) and role-based user access patterns for multi-role application environments.

RefereeIQ — *AI-powered learning app for rugby officials*

- Designed and implemented RAG-based AI workflows using semantic retrieval and contextual prompting.
- Defined ingestion, embedding, and knowledge retrieval strategies to support dynamic question interpretation.
- Built and iterated adaptive onboarding and feedback systems to improve user comprehension and engagement.

Legacy Ecowear — *Founder & Product Designer*

- Designed and managed the UX and UI of an e-commerce storefront, handling end-to-end product configuration, checkout, and customer experience.
- Defined a cohesive brand system and visual language for apparel catalogs, digital packaging, and custom team orders.
- Implemented user-centric optimizations to reduce ordering friction and improve product visibility across desktop and mobile.

EDUCATION

Justin X. Hale

Senior UX/Product Designer

(979) 703-0894 | JustinXHale@gmail.com | portfolio: justinxhale.github.io

Associate of Applied Science - Austin Community College - User Experience Design

Bachelor of Science - Sports Management Minor: Business and Communication-Texas A&M University
